**Subject:** RE: Summary Table

During the call yesterday, Phillip stated to change the definition of ND to the following:  
ND = Non detect **at** laboratory Reporting Limit (RL)  
He made a statement along the lines that we don't know if sample was actually below the reporting limit, but we do know that it was non detect **at** the reporting limit.  
This table will fit on one page. You need to go to the View tab, select Page Break Preview, and adjust the page break lines.  
Everything else appears to match my notes from yesterday's call.

**Subject:** Summary Table

Jose,

Attached the changes made to the summary table we discussed today per management. Phosphorus was changed to phosphine under the field blank and other comments. Just want to make sure with the new comments, the data validation is still documenting the correct message. Please verify. Thanks.
